RPA | Technology Solutions

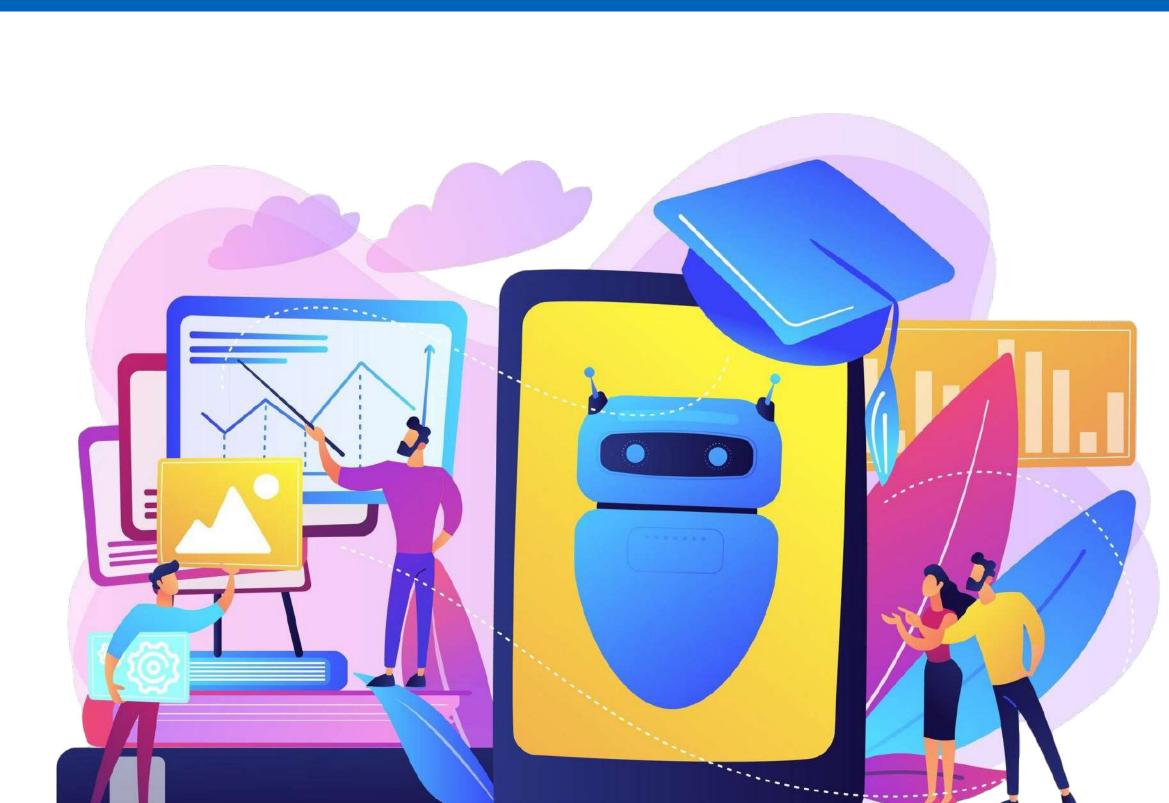

Transforming business efficiency through robotic process automation for a distribution organization.

Client Overview

The client, a multinational distribution company, offers a vast array of product lines, logistics services, and value-added solutions. For several years, they have been a trusted partner, providing premium software products and services that enable technology manufacturers and resellers to implement cutting-edge IT solutions.

Business Challenge

The client faced labor-intensive operational processes, especially in managing and reconciling invoices from thousands of vendors. With manual handling prone to errors and lengthy turnaround times, there was a clear need for automation to drive productivity, reduce errors, and ensure scalability. The goal was to streamline invoice processing, minimize human intervention, and increase accuracy in operations.

Techindo's Solution

Techindo implemented an RPA (Robotic Process Automation) solution using UiPath to automate and optimize critical business processes.

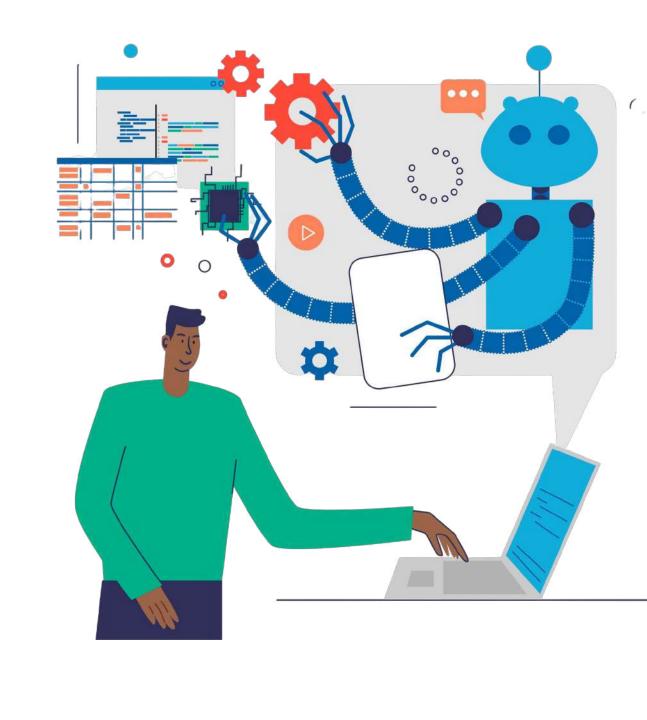

Bot Deployment

Automated the consumption and processing of vast volumes of statements from over 8,000 vendors.

Created a bot to identify missing invoices and automatically send email requests to vendors for additional data.

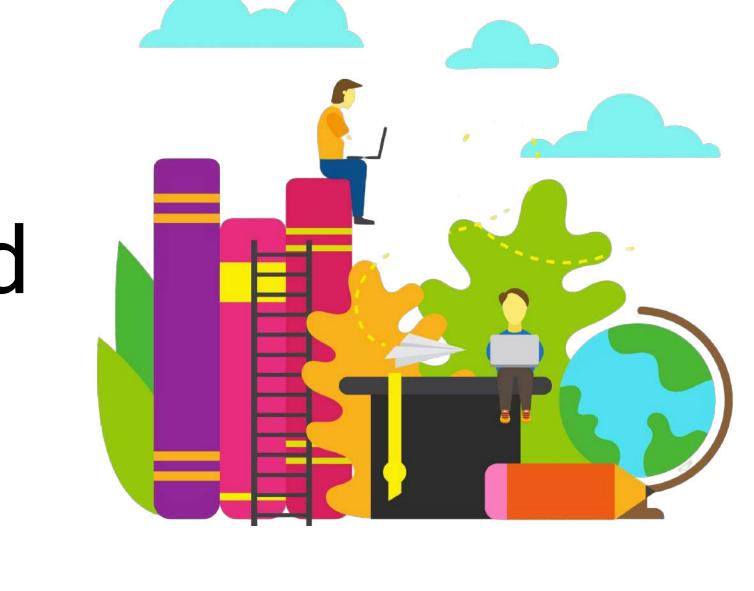

Scalability & Accuracy

Deployed bots that completed end-to-end processes in under 3 minutes, with enhanced accuracy.

train new employees, ensuring continuous improvement.

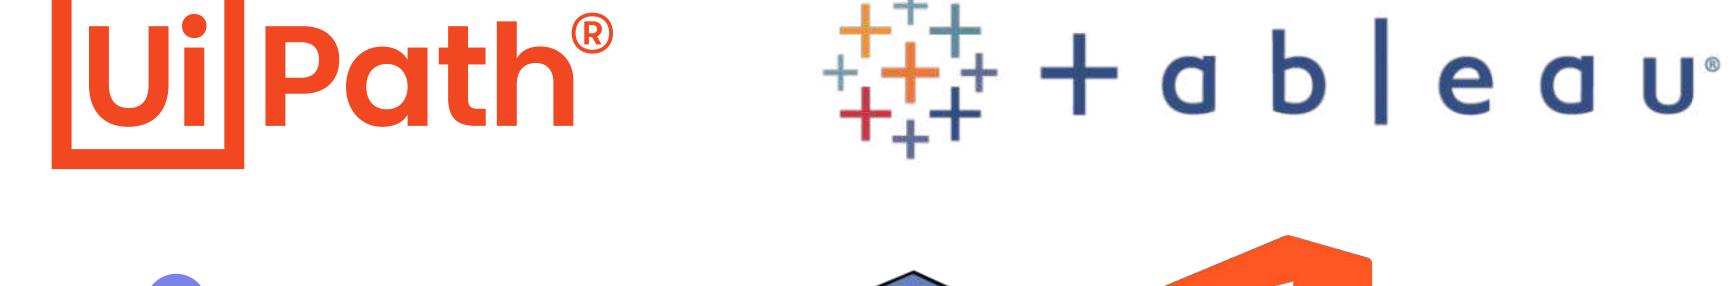

SAP Integration

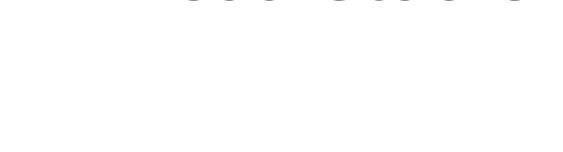

Streamlined discount reconciliations in SAP, payment cycles and ensure compliance with vendor agreements.

Technology Stack

Business Impact

Cut operation time

80% reduction

in processing time.

90% fewer manual errors,

boosting accuracy.

from days to minutes.

Efficient vendor payments, faster reconciliation, and improved

overall productivity.

By leveraging Techindo's RPA expertise, the client achieved unparalleled productivity, drastically reduced manual errors, and streamlined their

business operations. The automation not only minimized human effort but also enhanced their overall operational competency, positioning them for sustained growth and efficiency.
